

We Transform Your Business with Developer Operations (DevOps)

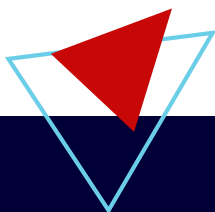

VAST INC.
ENTERPRISE IT SOLUTIONS

HI THERE!

We understand that the success of modern businesses relies heavily on the efficient delivery of high-quality software products. That's why we have made it our mission to revolutionize the software development lifecycle through cutting-edge DevOps practices.

ABOUT COMPANY

We are a leading IT company specializing in cutting-edge technology solutions and services, dedicated to helping businesses succeed in today's fast-paced digital landscape. With a comprehensive list of offerings spanning from and cloud services to containerization and CI/CD, We are committed to delivering unparalleled support for organizations of all sizes. Our team of certified professionals stands ready to provide expertise in AWS, Azure, Google Cloud, VCenter, Mail Services, Server Configurations, Hosting, Grafana, Graylog, Azure DevOps, GitHub Actions, Jenkins, and more.

Our experienced engineers leverage the latest advancements in DevOps practices and methodologies, utilizing tools such as Ansible, Terraform, Shell scripting, Docker, OpenShift, Kubernetes as well as version control with the help of Git.

By effectively automating infrastructure provisioning and management alongside continuous integration and deployment pipelines (CI/CD), our clients enjoy increased efficiency and accelerated product development cycles

HOW WE WORK

1

We pride ourselves on harnessing the power of cutting-edge technologies to deliver exceptional results for our clients. Our skilled team of experts specializes in working with Linux alongside a diverse range of tools and services, which cover every aspect of modern IT management and infrastructure. These tools and services include, but not limited to AWS, Azure, Ansible, Terraform, Shell scripting, Docker, OpenShift, Kubernetes, Google Cloud, VCenter, mail services, server configurations, hosting solutions, Grafana, Graylog, GitHub Actions, Jenkins and CI/CD pipelines.

2

By utilizing this wide array of technologies and platforms, we're able to offer our clients robust and scalable solutions that meet their specific needs. We have experience in deploying cloud infrastructures in AWS and Azure while leveraging container orchestration platforms like Kubernetes for microservices based applications. Our teams also optimize infrastructure management by using IaC tools like Terraform and Ansible for automating provisioning and configuration. For continuous integration and delivery processes (CI/CD), we help clients set up GitHub Actions or Jenkins to ensure automated testing and code deployment across environments.

OUR SERVICE

- **Platform Engineering Services**
- **Integrated DevSecOps Services**
- **Containerization Services**
- **Data Migration Solution & Services**

OUR SERVICE

- **Cloud Services
(Azure,AWS,GCP)**
- **Cloud Foundry Services**
- **VMware Services**
- **Migrate on - prem to
cloud**

HOW IT WORKS

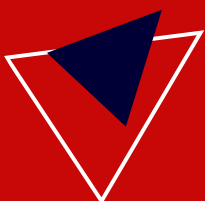

Process 01

In today's IT landscape, companies are increasingly focusing on embracing multi-cloud technologies and automation tools to optimize their infrastructure and streamline operations. Linux serves as a solid foundation for these companies due to its flexibility, robustness, and compatibility with various platforms including AWS, Azure, Google Cloud, and more. As organizations strive to create agile work environments, they also employ containerization platforms like Docker and OpenShift, along with Kubernetes for orchestration purposes.

Process 02

The adoption of infrastructure as code (IaC) principles through tools such as Ansible and Terraform allow IT companies to manage and deploy resources in a consistent, predictable manner. Shell scripting enhances the overall process by enabling automation of repetitive tasks across multiple environments. Additionally, these firms rely on continuous integration/continuous deployment (CI/CD) pipelines with Jenkins and GitHub Actions, ensuring efficient development cycles and seamless delivery of new features or updates.

CLIENTS FEEDBACK

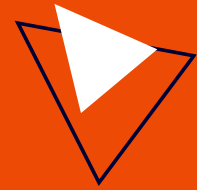

ADSOLUT

VaST ITES INC. has helped us to improve our customer satisfaction by 20%. Our customers are now more satisfied with the quality of our software and the speed with which we are able to deliver new features.

TALANCE

VaST ITES INC. has helped us to improve our software delivery process significantly. We are now able to release new features to our customers much faster and with fewer errors. This has had a positive impact on our business, and we are very happy with the results.

VaST ITES INC.

We are a leading provider of DevOps solutions, empowering businesses to achieve rapid and reliable software delivery. With a strong focus on collaboration, automation, and continuous improvement, we enable organizations to streamline their development and operations processes, driving efficiency, scalability, and innovation.

At our core, we are a team of seasoned professionals with extensive expertise in DevOps methodologies, tools, and best practices. Our consultants possess deep industry knowledge and a proven track record of successfully implementing DevOps transformations across a diverse range of industries.

If you are interested in learning more about our DevOps consulting services, please contact us today. We would be happy to discuss your specific needs and how we can help you achieve your business goals.
